Business Questions to Be Answered

1. Overall Sales Performance

- What is the total revenue and total quantity sold?
- What is the daily, monthly, and yearly sales trend?
- Which period recorded the highest and lowest revenue?

2. Product Performance Analysis

- Which product contributes the highest revenue?
- Which product category performs best?
- How do sales compare across different product categories?

3. Store Performance Analysis

- Which store generates the highest revenue?
- Which store has the lowest sales?
- How does sales performance vary across stores and regions?

4. Payment Method Analysis

- Which payment method is used most frequently?
- Which payment method contributes the highest revenue?
- How do sales compare across different payment methods?

5. Sales Trend Analysis

- Which month recorded the highest and lowest sales?
- Are there any recurring monthly sales patterns?
- How do sales change over time?

RETAIL SALES ANALYSIS: SUMMARY AND RECOMMENDATIONS

Overview

The workbook contains 2,000 sales records covering 14 October 2023 to 13 October 2025. The recorded sales value is approximately $2.17 million, with 4,948 units recorded in the quantity field. These figures give a useful overall picture of sales during the period, although a few missing values should be checked before the results are used for formal reporting.

What the data tells us

- Sports generated the highest sales value among the matched product categories, followed by Electronics and Home. These categories are worth reviewing when planning promotions and checking stock availability.
- PayPal recorded the largest share of sales value among the listed payment methods. Credit card and cash on delivery also contributed substantial amounts, so the workbook does not suggest that one payment option should be removed.
- STORE8 had the highest recorded sales value among the stores. It may be useful to compare its product mix, stock availability and local customer demand with those of other stores to understand what is working well.
- PROD39 was the top product by recorded sales value. The strongest month in the dataset was March 2025. Checking what was sold and whether any campaigns or seasonal factors contributed could help with future planning.

Recommended next steps

The business should first make sure that popular products are available, particularly in the stronger sales categories. Store performance should be reviewed alongside profit margins, stock levels and local demand rather than sales value alone. Payment methods should continue to be assessed using customer convenience, transaction costs and checkout performance.

Data checks before making decisions

Some fields contain missing values, including Total_Amount, Quantity, Unit_Price and Discount. In addition, 39 sales records could not be matched to a product category because their Product_ID was not found in the product table. These records should be checked and the lookup relationships corrected where possible. Category comparisons may change after those records are resolved.

Conclusion

Overall, the workbook provides a useful starting point for understanding sales by category, payment method, store and product. The next step is to validate the incomplete records and then compare sales with costs and discounts. This will help the business identify not only what sells well, but also which products and stores contribute most to profit.

Note: Sales value is not the same as profit. The analysis uses the available values in the workbook, and category findings depend on successful product matching.
